

# Capability Statement

We provide solutions that automate processes, manage content and keep data secure

## Next Phase Solutions

### CORE COMPETENCIES

#### Stability from Day One

Blaze through audits with a reliable history and reportable data structures while knowing your data is encrypted in transit and at rest. Never wonder again if your data and documents are accessible to the wrong people. They aren't.

Stabilize

Simplify

Modernize

#### Systematic Modernization

Change can be scary but with a reliable platform based on a single database that has the power to integrate with existing systems and a team with decades of architecting experience, transformation can be methodical and decisive.

#### Simplify More Than Process

Commercial-off-the-shelf (COTS) software that configures with no coding means that deploying solutions to meet regulatory changes and compliance can be completed in days instead of months. Going paperless and mobile with auditable workflow routing, records management and electronic signatures makes compliance a breeze.

Authorized Solution Provider

Schedule

GSA Schedule 70: 47QTCA19D001R  
CAGE: E2E88  
DUNS: 099104413

### DIFFERENTIATORS

OnBase by Hyland provides rapid application deployment with point-and-click configuration. Our key people each have at least 10 years of experience working with OnBase. We can deploy in a secure cloud or on-premise. Our solution does not require a large team of developers. Return on investment is fast, and ongoing support is minimal. This platform can fulfill a niche need or scale to support every department in your agency. Software is developed in the USA.
