

Capability Statement

Your partner for designing and configuring secure Information Management solutions

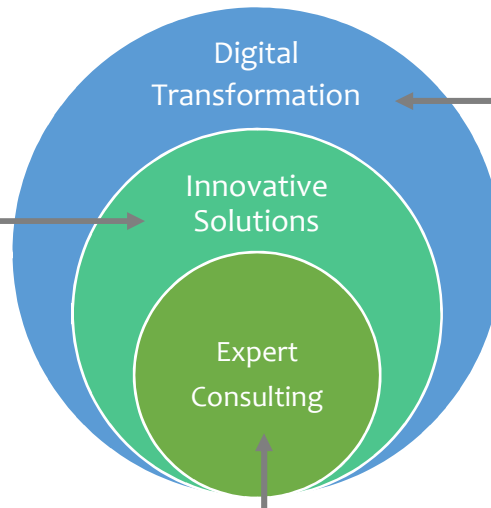

Next Phase Solutions

CORE COMPETENCIES

Solutions

Commercial-off-the-shelf (COTS) software that configures with no code means developing solutions to meet regulatory changes and compliance can be completed in days instead of months. Going paperless and mobile with auditable workflow routing, records management and electronic signatures modernizes business practices.

Consulting

Infrastructure, hardware, data conversion, reporting, business analysis, ongoing support, and project management are just some of the services we offer to ensure your applications are being built for scale and security.

Transformation

Changing technology can be intimidating. OnBase provides a reliable platform built on a single database with the power to integrate existing systems, and our team is experienced with organizational change management and planning. With rapid application deployment supported by sound IT and change management policies, transformation can be methodical and decisive, letting you focus on your mission.

DIFFERENTIATORS

OnBase by Hyland provides rapid application deployment with point-and-click configuration. Our key people each have at least 10 years of experience working with OnBase. We can deploy in a secure cloud or on-premise. Our solutions do not require a large team of developers. Return on investment is fast and ongoing support is minimal. This platform can fulfill a niche need or scale to support every department in your agency. Software is developed in the USA.
